

## **Amendments to the Specification**

Please amend the following paragraph on page 19, line 23 of the Specification as follows:

The preferred mode of delivery of the compositions of the invention is in the form of a fabric washing powder. These are typically dosed at around 7 g/litre, into 15-20 litres of wash water. Thus around ~~2.5 g/litre~~ 0.06 to 0.01 g/litre of the beta 1-4 polysaccharide will be present in the wash liquor.
